SMK CORPORATION

"Value Creation and Progress"

— Technologies, Quality and Manufacturing

Action Guidelines

- 1. Contribute to society with pride and confidence.
- 2. Be customer-oriented, with zeal and sincerity.
- 3. Challenge courageously for higher goals without fear of failure.
- 4. Trust and respect each other for a brighter working atmosphere.
- 5. Keep an open mind, and view SMK from a global perspective.

Overview

During the term under review, the global economy remained buoyant, primarily supported by emerging countries such as China and Russia in the first half of the year. However, the economic situation became uncertain in the second half, impacted by the credit crunch stemming from the U.S. mortgage crisis, concerns over a slowing U.S. economy, and soaring prices of crude oil and other resources. In the Japanese economy, with the impact of the weak U.S. dollar against global currencies, the economic outlook is now much more uncertain. In the electronics industry, sales grew strongly on the strength of strong global demand for mobile phones, and growing use of new digital consumer electronics. Profit opportunities, however, have diminished reflecting a rapid weakening of the U.S. dollar, high raw material costs, and a decline in product prices.

In this environment, SMK has sought to strengthen the appeal of its products and reduce costs. As a result, aided by strong demand for connectors for mobile phones and control switches for flat-panel televisions from overseas customers, net sales and operating income rose. Net income, however, declined, reflecting the rapid appreciation of the yen in the fourth quarter of the term under review.

"Value Creation and Progress — Technologies, Quality and Manufacturing"

Based on our corporate philosophy of being "committed to the advancement of mankind through development of the information society, by integrating current technological strengths and creating advanced technology," we aim to "establish a position as the leading supplier of information technology infrastructure in the global information society."

In recent years, while the speed of change has accelerated due to the diversification of consumption and the digitalization of products, the period for product development has shortened, and demand for further improvement in the quality of electronics components has been growing. To respond quickly to these changes, and overcome competition, we will carry out zero defects initiatives, and redevelop a manufacturing structure in an effort to enhance the SMK brand and product quality under our new slogan, "Value Creation and Progress — Technologies, Quality, and Manufacturing."

In 2008, we will focus in particular on advancing our technologies. We will seek to develop cutting-edge technologies, and improve basic elemental technologies. We will also seek to restructure high-precision processing technologies to pass skills down to the next generation. Also, we will enter new markets by introducing new products that achieve differentiation in the market with unique technologies.

As part of our commitment to fulfill our corporate social responsibility (CSR), we have developed a structure to respond to the internal control reporting system (the Financial Instrument's and Exchange Act) that will be adopted from April this year. In line with this initiative, we also established an internal audit office. We, at SMK, will take every possible measure to ensure management transparency by developing corporate governance systems.

Although the earnings environment is likely to become more severe in the future, we are fully committed to enhancing corporate value and bolstering profits by executing the 7th Medium Term Business Plan that was launched last year. We hope that we can continue to count on the understanding and support of our shareholders as we pursue this goal.

Sales and Market Overview

(April 1, 2007 to March 31, 2008)

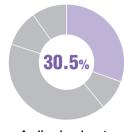

Net Sales Millions of yen 2005 2006 2007 2008

Audio-Visual

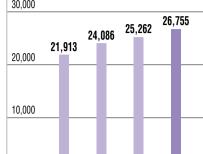

HDMI Standard Type A receptacle

Audio-visual parts ¥26.755 million

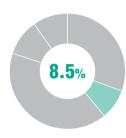

increased worldwide. To respond to customer needs in the future, we will enhance our lineup of new products, including high-speed transmission parts, such as HDMI connectors, and RF remote controls.

Car Electronics

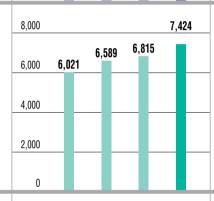

"Force-feedback"

Electronic instruments ¥7,424 million

Sales of microphone units, touch panels, and remote controls for car navigation systems remained strong. Sales of connectors for car entertainment were also strong. We will continue to develop parts for cameras mounted on vehicles and for receiving terrestrial digital broadcasting, and will focus on initiatives in developing vehicle-mounted Bluetooth and parts used in operating systems.

Spurred by growing demand for cellular phones in emerging

Western countries, strong sales of connectors to major overseas

performance. We will continue to focus on developing light,

compact connectors and products that enable the creation of

high-frequency parts and parts used in operating systems.

value-added cellular phones in the future. These products include

countries, such as BRICs, and for high-function models in

cellular phone manufactures contributed to our overall

Sales of remote controls and connectors, as well as DVD

recorders remained robust as demand for flat-panel televisions

Communication

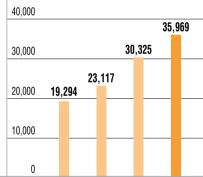

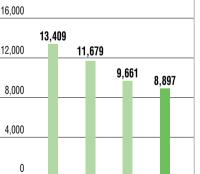

Communications parts ¥35,969 million

16,000 13,409 12,000 11,679

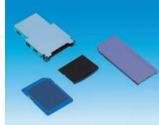

Information. office equipment parts ¥8,897 million

Although sales of connectors for digital still cameras and ATM touch panels remained strong, overall sales were stagnant, reflecting a lower-than-expected contribution from parts for PCs with audio-visual functions and the ECR/POS. We will continue to develop connectors and high-frequency parts for laptop and mobile PCs, the markets for which are growing.

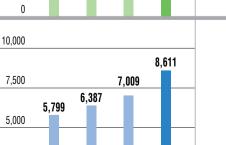

Information

xD-4in1

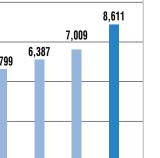

Electronic toys, home electronics and other parts ¥8,611 million

2,500

9.8%

Demand for parts for the video game market remained strong. Sales of remote controls for home electronics and housing equipment, including air conditioners and lighting fixtures, was also buoyant. In light of the growth in awareness of energy saving and environmental friendliness around the world, we will strengthen expanding sales in growth markets, including the solar cell market, in which we will strive to bolster the product range of connectors used for solar cell modules.

Future Outlook

Although short-term adjustment is likely to take place, the electronic component industry is expected to sustain its growth in the medium-to-long term, supported by the Beijing Olympic Games scheduled to be held this summer, the anticipated expansion of the new digital home electronics market, especially in Japan, the United States and Europe, and the steady demand for products associated with the ICT in both domestic and overseas markets, including the BRICs.

To continue to grow in an increasingly difficult environment, SMK, through initiatives in telecommunications, IT, and digital home consumer electronics, is aiming to rapidly respond to growth areas and cultivate new markets. While concentrating on the development of new technologies and new products suited to consumer needs, the advancement of production technology and the establishment of an efficient sales organization, we will endeavor to improve our cost competitiveness and boost our business performance.

For the coming fiscal year, we will aim to achieve higher sales and secure profits through initiatives, including strengthening of production and our sales organization. We anticipate consolidated net sales of ¥94.5 billion, operating income of ¥5.6 billion, ordinary income of ¥6.2 billion, and net income of ¥3.8 billion.

Home Electronics

Rectangular connectors for car navigation equipment compatible with the reception of terrestrial digital broadcasts developed and marketed

SMK has developed and launched a new industry vanguard: rectangular connectors for car navigation equipment, compatible with the reception of terrestrial digital broadcasts. Recent years have seen a trend of making car interiors venues for a place to enjoy terrestrial digital broadcasts of high quality video images. Accordingly, providing the capability of receiving terrestrial digital broadcasts has effectively become the standard for car navigation equipment. To respond to this market trend, car navigation equipment is increasingly being equipped with a tuner for terrestrial digital broadcasts, creating greater demand for small connectors for connection of an antenna and a tuner.

This new connector is designed to have a profile when mounted of just 9.7 mm, a depth of just 13.9 mm, a width of 15.5 mm and a PWB occupancy area (2-pole receptacle) of 215.5 mm², to help equipment designers make their products smaller and more PWB space effective. A compatible locking mechanism for joining the plug and the receptacle is ensured by the push-on mold locking system provided.

Receptacles are available in two versions: a single-pole type (for one-segment broadcast tuners) and a 2-pole type (for terrestrial digital broadcasts of 12 segments).

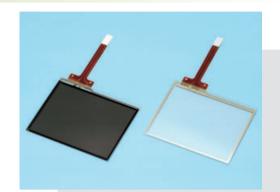

Rectangular connectors for car navigation equipment compatible with the reception of terrestrial digital broadcasts

SMK has developed and begun to accept orders for two types of touch panel: a film + film type, in which films are used for both the upper and lower electrodes; and a low reflection film + film type. Mobile usage of products such as digital camcorders, DSCs, and

upper and lower electrodes; and a low reflection film + film type. Mobile usage of products such as digital camcorders, DSCs, and portable terminal equipment are required to be lightweight and thin. Touch panels for these products must be resistant to breakage when dropped. These touch panels are also required to be low in reflection to prevent deteriorated visibility resulting from the reflection of, for example, direct sunlight, on the screen when the equipment is used outdoors.

These new touch panels introduced are light, thin and unbreakable when dropped. They also inhibit reflection, enhancing the visibility of LCDs. These new touch panels include a "film + film type," where PET film is used for the upper and lower electrodes, and a "low reflection film + film type," which is made up of an optically isotropic film for the upper and lower electrodes with a polarizing plate laid over the touch panel screen. The panels are able to be directly attached to screens of LCDs.

These touch panels can also be delivered in the form of "film + film + plastic type" which is a film + film type touch panel with a 1-2 mm thick plastic plate laid over the panel.

Right: film + film type Left: low reflection film + film type

New products developed to expand the switch business

SMK has been focusing on developing new products to further expand its switch business. We have developed and introduced compact, multifunctional, and highly endurable products to the information market, where demand for cellular phones and digital camera has been growing, thus contributing to the miniaturization and greater reliability of sets. Also, aiming to increase sales in the vehicle-mounted equipment market, whose use of digital equipment is rapidly growing, we have developed long-life products with high contact stability for this

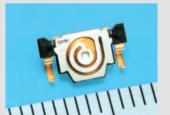

[1] JSD series long-life thin slide switches

By maintaining a height of 1.1 mm, the thinnest of its kind in the industry, JSD series long-life thin slide switches have achieved an operating life of 100,000 cycles (10 times that of our previous equivalents).

[2] 1-dome switch

A 1-dome switch achieved a reduction of 16% in height compared with our previous equivalents, providing a stable connection and effective anti-ESD performance by employing a metal cover.

[3] New rubber single-key switch

A new rubber single-key switch has achieved an operational life as three times long as that of our previous equivalents, and high contact stability. With a broad product lineup, we will respond to a range of needs for vehicle-mounted equipment.

High-speed power line communication module developed

Two types of film + film touch panel developed

SMK has developed and begun to accept orders for the 14 Mbps PLC Module PL014-0J. High-speed power line communication, often shortened to High-speed PLC is a communication technology that enables high-speed data transmission through power lines, which had previously only been used overseas. In Japan, use of High-speed PLC was permitted in October 2006, and SMK began developing PL014-0J.

By using PL014-0J, which transmits data through the power lines that we are throughout every room in a building or a house, high-speed data transmission can become available without extra communication lines newly wired. In addition, equipped with cryptographic technology for security of data communications, PL014-0J offers a highly reliable communication network.

With data rate of 14 Mbps (physical layer), PL014-0J is compatible with Ethernet as an external interface. As a result, High-speed PLC is realized just by installing PL014-0J into devices communicating in an Ethernet environment.

Moreover, PL014-0J is an all-in-one module that is equipped with a coupling circuit and an Ethernet transformer, into which a security design is embedded. PL014-0J is designed to be as small as a business card, offering enhanced usability.

14 Mbps PLC module PL014-0J

7

Major Activities — FY2007 ended March 2008

April to June

- SMK announces results for the 85th term, reporting higher sales and profits for the fourth consecutive term.
- The 7th Medium Term Business Plan begins.
- The SMK Special successfully completes the Beijing-Paris rally.
- OSMK Electronics (Shenzhen) Co., Ltd. is ranked 46th in the "Top Hundred Electronics Component Companies in China."
- Mexican Ambassador to Japan visits SMK.

2007

July to September

- SMK acquires remote control business from Interlink Electronics Inc. of the United States.
- SMK makes donations to the Niigata Prefecture Emergency Task Force Headquarters for the victims of Niigata Chuetsu Offshore Earthquake.
- SMK is ranked 113th out of 399 companies nominated in the "Worker Friendly Companies" list published by the Nihon Keizai Shimbun.
- 1 SMK commercializes the first connectors for the photovoltaic module.

Photovoltaic module connectors

CEATEC JAPAN is the largest cutting-edge IT and electronics general exhibition in Asia, where most sophisticated technologies products, and services are presented. SMK participated in the exhibition focusing on the demonstration of its products to raise he customer awareness of the SMK brand

Note 1: FPD International (Yokohama)

FPD International is a general exhibition of flat panel displays, equipment, parts and materials. SMK presented an exhibition of touch panels. Our force feedback touch panels, which offer a variety of sizes ranging from 3.8 inch to 10.4 inch, attracted attention from a large number of visitors

Note 2: Embedded Technology (Yokohama)

Embedded Technology is the world's largest special technology exhibition of the embedded technology that is essential for cutting edge technologies, such as digital consumer electronics, mobile terminals, car electronics industrial equipment, and RFID. The embedded technology is a technology associated with products and systems, to which microprocessors and the software that control these microprocessors, are embedded. SMK presented a variety of communication modules and camera modules, and received a large number of visitors

2007

October to December

- SMK establishes an Internal Audit Department.
- 2 O SMK exhibits at the CEATEC JAPAN (Chiba).
- 3 The remote control with a laser pointer for presentation receives the Good Design Award 2007.
 - SMK exhibits at the FPD International (Yokohama). (Note 1)
- Terutaka Ikeda, Chairman and CEO, becomes Vice Chairman of the Tokyo Chamber of Commerce and Industry.
- SMK exhibits at the Embedded Technology (Yokohama). (Note 2)
- Director and General of Training and Employment Authority of Government of Ireland visits SMK.
- SMK makes entrustment of a fund the U.S. Red Cross for Californian fire victims.
- The third plant is established in Dongguan, China.

2008

January to March

- SMK establishes sales offices in Helsinki and Shenzhen.
- 4 O SMK exhibits at CES (Las Vegas).
 - SMK exhibits at the Fiber Optics EXPO (Tokyo). (Note 3)
 - SMK establishes a sales company in Mexico.

Navigator and Presenter received the Good Design Award 2007.

CES (Las Vegas)

CES is the world's largest civil electronics equipment exhibition that presents cutting-edge products and services of the home appliances industry. SMK aggressively promoted its technologies by exhibiting a range of control switches at the home automation corner and pointing device corner. The demonstration of force feedback touch panels was reported by

The Fiber Optics EXPO is the largest exhibition of fiber optics technologies in Asia, in which fiber optics systems and devices, and equipment associated with the next generation network are presented. SMK exhibited the Metal Ferrule, to which SMK has a patent in the connector zone

ABC News of the United States reports on SMK's touch panels.

The leading U.S. news service has run a story on progress in touch panels on its website, mentioning SMK's touch panels (on January 20, 2008).

The story reports that previous LCD panels for automobiles did not allow drivers to sense that they were pressing the panel, so the drivers had to look at the panels to control them, diverting their attention from the road. Addressing this problem with support from automakers, Stanford University has been developing a new touch panel that enables communication between people and machines. With these new touch panels, drivers can tell that they have pressed the right buttons thanks to the vibration they feel in their fingertips when they touch the panel.

SMK developed the first commercial LCD panels to give users the impression they are pressing buttons. The report that introduced a force feedback touch panel developed by SMK concluded that it would be intriguing to see future developments, namely which automobile manufacturers would adopt the new panels first.

SMK has licensed the story from ABC News and made it available on its website with Japanese subtitles.

Financial Review

SMK's net sales for fiscal 2008, which ended March 31, 2008, increased 10.9% year-on-year, to ¥87,659 million (US\$874,928 thousand). Operating income increased 9.4% year-on-year to ¥5,654 million (US\$56,438 thousand) with net income of ¥2,094 million (US\$20,901 thousand), a 43.3% decrease year-on-year.

Net Sales

Along with expansion of demands within emerging countries including China, India etc., sales of communications parts for cellular phones increased steadily. In addition, with worldwide market development for flat-panel televisions, audio-visual parts for digital home electronics contributed to an increase in revenue. As a result, net sales were ¥87,659 million (US\$874,928 thousand), up 10.9% year-on-year.

Operating Income

As a result of an increase of net sales and our continuous cost reduction efforts to keep pace with a higher sales cost ratio caused by declining product prices and appreciation of raw material prices, operating income became ¥5,654 million (US\$56,438 thousand), exceeding the level of previous fiscal year.

Net Income

In spite of good performance in operating income, net income was ¥2,094 million (US\$20,901 thousand) due to substantial foreign currency exchange loss incurred by sharp yen appreciation in the 4th quarter of the fiscal year under review.

Total Net Assets/ROE

As of March 31, 2008, total net assets were at \(\pm\)32,386 million (US\\$323,246 thousand). ROE was at 6.3%.

Total Assets/ROA

As of March 31, 2008, total assets were \$66,737 million (US\$666,107 thousand). ROA was at 3.2%.

Cash Flows

Net cash flow from operating activities amounted to ¥6,070 million (US\$60,589 thousand), net cash used in investing activities totaled ¥6,819 million (US\$68,068 thousand) and net cash provided by financing activities was valued at ¥533 million (US\$5,327 thousand).

Notes to Consolidated Financial Statements

SMK Corporation and Consolidated Subsidiaries

Note 1. Summary of significant accounting policies

(a) Basis of presenting financial statements

The accompanying consolidated financial statements of SMK Corporation (the "Company") and consolidated subsidiaries are prepared on the basis of accounting principles generally accepted in Japan, which are different in certain respects as to application and disclosure requirements of International Financial Reporting Standards, and are compiled from the consolidated financial statements prepared by the Company as required by the Financial Instruments and Exchange Law of Japan. For the purpose of this document, certain reclassifications have been made in the accompanying consolidated financial statements to facilitate understanding by readers outside Japan. In addition, certain reclassifications have been made to the prior year's consolidated financial statements to conform to the current year's presentation.

(b) Basis of consolidation and investments in affiliated companies

The accompanying consolidated financial statements include the accounts of the Company and all subsidiaries over which substantial control is exercised either through majority ownership of voting stock and/or by other means. All significant intercompany balances and transactions have been eliminated in consolidation.

Certain foreign subsidiaries' fiscal periods end December 31, which differs from the year-end date of the Company; however, the accounts of these companies were tentatively closed as of March 31 and the necessary adjustments for consolidation were made.

Investments in affiliates (companies over which the Company has the ability to exercise significant influence) are stated at cost plus equity in their undistributed earnings or losses. Consolidated net income includes the Company's equity in the current net income or loss of such companies, after the elimination of unrealized intercompany profits.

All assets and liabilities of the Company's subsidiaries are revalued on acquisition, if applicable, and the excess of cost over the underlying net assets at the date of acquisition is amortized over a period of five years on a straight-line basis if such excess is material, or charged to income when incurred if immaterial.

(c) Scope of consolidation

Number of consolidated subsidiaries: 19

The remaining 7 subsidiaries which are unconsolidated are deemed immaterial and, accordingly, their results of operations had no significant effect on the consolidated financial statements.

From the year ended March 31, 2008, SMK Link Electronics was included in the scope of consolidation.

(d) Application of equity method of accounting

Number of affiliated companies accounted for by the equity method: 2

The 7 unconsolidated subsidiaries and one other affiliated company are deemed immaterial. As the effect of their results of operations on the consolidated financial statements would be insignificant, the equity method of accounting has not been applied to these companies.

(e) Translation of foreign currencies

All asset and liability accounts of foreign subsidiaries and affiliates are translated into Japanese yen at the appropriate year-end exchange rates except for shareholders' equity, which is translated at rates of exchange prevailing at the time the transactions occurred. Revenue and expense accounts are translated at the average rates of exchange prevailing during the year.

(f) Cash and cash equivalents

Cash and cash equivalents are composed of cash and time deposits all of which are low-risk, short-term financial instruments readily convertible into cash.

(g) Inventories

Inventories are stated at cost as determined principally by the following methods:

Finished products: Retail cost method

Work in process: Actual raw material cost, determined by the most recent purchase cost method,

plus direct labor costs and manufacturing overheads

Raw materials and supplies: Most recent purchase cost method

(h) Securities

Securities are classified into three categories depending upon the holding purpose and accounted for as follows:
i) trading securities, which are held for the purpose of earning capital gains in the short-term, are stated at fair market value, with related gain and loss realized on disposal and unrealized gain and loss from market fluctuations recognized as gain or loss in the statement of income in the year of the change; ii) held-to-maturity debt securities, which a company has the positive intent to hold until maturity, are stated at amortized cost; and iii) other securities, which are not classified as either of the aforementioned categories but are stated at fair market value if such value is available, or, if not, at moving-average cost, with unrealized gain and loss, net of the applicable taxes, reported as a separate component of net assets. Realized gain and loss on sales of such securities are calculated based on the moving-average cost.

(i) Derivatives

Derivatives are stated at fair value.

(j) Property, plant and equipment and depreciation

Property, plant and equipment is stated at cost. Depreciation of property, plant and equipment is calculated principally by the declining-balance method for the Company and its domestic subsidiaries, and by the straight-line method mainly for foreign subsidiaries.

(k) Allowance for doubtful accounts

The allowance for doubtful accounts is provided at the amount of estimated uncollectable accounts, based on individual collectability with respect to identified doubtful receivables and past experience of doubtful receivables.

(1) Accrued bonuses

Accrued bonuses are provided on the estimate of the amounts to be paid in the future by the Company, domestic consolidated subsidiaries and certain overseas subsidiaries based on an accrual basis at the balance sheet date.

(m) Accrued directors' bonuses

Accrued directors' bonuses are provided on the estimate of the amounts to be paid in the future by the Company based on an accrual basis at the balance sheet date.

(n) Accrued retirement benefit obligations

To cover projected employee benefits, the Company records the estimated obligations at the end of the fiscal year based on projected year-end benefit obligations and plan assets, as adjusted for unrecognized actuarial gains or losses and unrecognized prior service cost.

Unrecognized actuarial gains or losses are amortized in the year following the year in which the gains or losses are incurred by the straight-line method over the period of 5 years which is within the average remaining years of service of the employees.

Unrecognized prior service cost is amortized in the year following the year in which the prior service cost is incurred by the straight-line method over the period of 5 years which is within the average remaining years of service of the employees.

(o) Accrued directors' and officers' retirement benefits

Accrued directors' and officers' retirement benefits have been provided at an amount equal to 100% of the amount which would be required to be paid based on the Company's bylaws if all directors and officers resigned from the Company on the balance sheet date.

(p) Hedge accounting

(1) Method of hedge accounting

The exception method of hedge accounting is applied for the transactions of interest rate swaps, in cases meeting certain conditions.

(2) Hedge instrument and hedged item

Hedge instrument: interest rate swap

Hedged item: interest rate for long-term borrowings subject to interest rate fluctuations.

(3) Hedge policy

The Company uses interest rate swaps to avoid risks from interest rate fluctuations on borrowings, only when approved by the management.

(4) Assessment of hedge effectiveness

As the exception method is applied for interest rate swap, the assessment of hedge effectiveness is omitted.

(a) Income taxes

Deferred income taxes are recognized based on the differences between financial reporting and the tax bases of the assets and liabilities and are calculated using the enacted tax rates and laws which will be in effect when the differences are expected to reverse.

(r) Leases

Finance leases other than those which are deemed to transfer the ownership of the leased assets to the lessee are not capitalized, but are accounted for by a method similar to that applicable to operating leases.

(s) Per share information

Basic net income per share is computed based on the net income available for distribution to shareholders of common stock and weighted-average number of shares of common stock outstanding during the year. Diluted net income per share is computed based on the net income available for distribution to shareholders and weighted-average number of shares of common stock outstanding during each year after giving effect to the dilutive potential of shares of common stock to be issued upon the conversion of convertible bonds.

Net assets per share is computed based on the net assets available for distribution to shareholders of common stock and the number of shares of common stock outstanding at the balance sheet date. Cash dividends per share shown for each period in the consolidated statements of income represent the dividends applicable to the respective period.

Note 2. U.S. Dollar amounts

The U.S. dollar amounts are stated solely for the convenience of the reader at the rate of U.S.\$1.00 = \$100.19, the approximate rate of exchange at March 31, 2008. The translation should not be construed as a representation that the Japanese yen amounts actually represent, have been or could be converted into U.S. dollars at that or any other rate.

Note 3. Inventories

Inventories as of March 31, 2007 and 2008, consisted of the following:

	Millior	is of yen	Thousands of U.S. dollars
	2007	2008	2008
Finished products	¥ 3,358	¥ 4,727	\$ 47,180
Work in process	451	770	7,688
Raw materials	2,534	2,616	26,106
Supplies	53	94	941
	¥ 6,396	¥ 8,207	\$ 81,915

Note 4. Short-term loans payable and long-term debt

Short-term loans payable principally to banks were unsecured and represented with interests ranging from 1.12083% to 7.25% per annum as of March 31, 2008.

Long-term debt as of March 31, 2007 and 2008, consisted of the following:

	Million	s of yen	Thousands of U.S. dollars
	2007 2008		2008
Loans, principally to banks with interest rates ranging from 1.12083% to 7.25%:			
Secured	¥ 1,531	¥ 985	\$ 9,834
Unsecured	3,130	6,046	60,346
Less: portion due within one year	(1,520)	(1,989)	(19,858)
	¥ 3,141	¥ 5,042	\$ 50,322

The assets pledged as collateral for long-term debt as of March 31, 2008, were summarized as follows:

	Millions of yen	Thousands of U.S. dollars
it-book value	¥ 1,555	\$ 15,522

The aggregate annual maturities of long-term debt outstanding as of March 31, 2008, are summarized as follows:

Year ending March 31,	Millions of yen	Thousands of U.S. dollars
2009	¥ 1,989	\$ 19,858
2010	448	4,477
2011	483	4,817
2012	649	6,474
2013 and thereafter	3,462	34,554
	¥ 7,031	\$ 70,180

Note 5. Research and development costs

Research and development costs included in cost of sales for the years ended March 31, 2007 and 2008, amounted to ¥3,972 million and ¥3,387 million (\$33,812 thousand), respectively.

Note 6. Selling, general and administrative expenses

Major elements of selling, general and administrative expenses for the years ended March 31, 2007 and 2008, were as follows:

	Millior	ns of yen	Thousands of U.S. dollars
	2007	2008	2008
Freight and packing cost	¥ 646	¥ 665	\$ 6,642
Salaries and wages of employees	3,093	3,843	38,359
Provision for bonus	386	369	3,678
Provision for directors' bonus	95	83	828
Retirement benefit cost	(52)	(166)	(1,656)
Provision for directors' and officers' retirement benefit	63	44	438
Depreciation	194	240	2,392

Note 7. Impairment of fixed assets

From the year ended March 31, 2006, the Company accounted for fixed assets in accordance with "Opinion Concerning Establishment of Accounting Standard for Impairment of fixed Assets" issued by the Business Accounting Deliberation Council and "Guidance for the Application of Accounting Standard for Impairment of Fixed Assets" issued by the Accounting Standards Board of Japan. Under this standard and guidance an impairment loss be recognized where the carrying amount of asset exceeds undiscounted future net cash flows expected to be generated by such asset. The impairment loss is measured by the amount by which the carrying amount of the asset exceeds its recoverable amount being higher of discounted future net cash flows or net realizable value.

For the year ended March 31, 2007 and 2008, the impairment losses were recognized for the following assets.

			Millions of yen									
							20	007				
Asset group	Location	Use	Buil	dings		hinery ehicles		ing and urnitures		ased sets	T	otal

Note 8. Income taxes

Income taxes applicable to the Company and its domestic subsidiaries comprised corporation, inhabitants' and enterprise taxes which, in the aggregate, resulted in statutory tax rates of approximately 40.5% for the years ended March 31, 2007 and 2008, respectively.

Reconciliations between the statutory tax rate and the effective tax rates for the years ended March 31, 2007 and 2008, are as follows:

	2007	2008
Statutory tax rate	40.5%	40.5%
Items such as entertainment expenses permanently not deductible for tax purposes	1.4	1.4
Tax credit for research and development cost	(3.1)	(4.7)
Foreign tax credit	(2.3)	(8.0)
Change in valuation allowance	(2.0)	2.4
Statutory tax rate differences in subsidiaries	(7.2)	0.1
Elimination of dividend income	10.7	16.9
Other	2.6	(0.9)
Effective tax rates	40.6%	47.7%

The significant components of deferred tax assets and liabilities at March 31, 2007 and 2008, were as follows:

_	Million	s of yen	Thousands of U.S. dollars		
_	2007	2008	2008		
Deferred tax assets:					
Inventory write-down disallowed	¥ 75	¥ 70	\$ 702

Other	(63)	(74)	(732)		
Net deferred tax assets	¥ 1,918	¥ 1,603	\$ 16,002		
=					

Note 9. Shareholders' equity

The Corporation Law of Japan provides that an amount equal to 10% of the amount to be distributed as distributions of capital surplus (other than the capital reserve) and retained earnings (other than the legal reserve) be transferred to the capital reserve and the legal reserve, respectively, until the sum of the capital reserve and the legal reserve equals 25% of the common stock account. Such distributions can be made at any time by resolution of the shareholders, or by the Board of Directors if certain conditions are met, but neither the capital reserve nor the legal reserve is available for distributions.

Note 10. Contingent liabilities

Contingent liabilities as of March 31, 2007 and 2008, were as follows:

	Million	s of yen	Thousands of U.S. dollars
	2007	2008	2008
Guarantees of loans	¥ 500	¥ 500	\$ 4,991

Note 11. Treasury stock

The number of common stock of the Company held by the Company, consolidated subsidiaries and affiliated companies subject to the equity method at March 31, 2007 and 2008, totaled 1,401,902 shares and 3,307,091 shares, respectively.

Note 12. Securitie

Information regarding marketable securities classified as other securities at March 31, 2007 and 2008, was summarized as follows:

			Millions	s of yen			Thous	ands of U.S.	dollars
		2007			2008			2008

Others	\$ —	\$ 392	\$ 402			

Note 13. Accrued employees' retirement benefits

(a) Outline of retirement benefit plans

The Company and certain of its domestic consolidated subsidiaries transferred the retirement benefit plans to the corporate pension fund plans under the Defined Benefits Enterprise Pension Law of Japan on April 1, 2004. On the same day the approval was obtained for the exemption from the substituted portion of the welfare pension fund plans from the Minister of Health, Labor and Welfare. At the same time, the Company and certain of its domestic consolidated subsidiaries revised the retirement benefit schemes and adopted the cash balance pension plans and the defined contribution pension plans for a part of future contribution.

(b) Retirement benefit obligation as of March 31, 2007 and 2008

	Million	s of yen	Thousands of U.S. dollars
	2007	2008	2008
Retirement benefit obligation	¥ 6,856	¥ 6,955	\$ 69,413
Fair value of plan assets	(8,612)	(6,902)	(68,885)
Funded status	(1,756)	53	528
Unrecognized actuarial gains (losses)	1,265	(882)	(8,804)
Unrecognized prior service cost	938	465	4,643
Net amount recognized in the consolidated balance sheets	447	(364)	(3,633)
Prepaid pension costs		377	3,763
Accrued employees' retirement benefits	¥ 447	¥ 13	\$ 130
=			

(c) Retirement benefit cost	Million	ns of yen	Thousands of U.S. dollars

Contribution to defined contribution pension plan	44	45	453		
Net periodic cost	¥ (190)	¥ (498)	\$ (4,969)		

(d) Assumptions to calculate the actuarial present value of the benefit obligation and the expected return on plan assets

	2007	2008
Discount rate	2.0%	2.0%
Expected return on plan assets	3.5%	3.5%
Amortization period of unrecognized actuarial gains or losses	5 years	5 years
Amortization period of unrecognized prior service cost	5 years	5 years

Note 14. Derivatives

As a matter of policy, the Company does not speculate in derivative transactions. The Company does not anticipate nonperformance by any of the counterparties to the derivative transactions, all of whom are leading domestic financial institutions with high bond ratings.

In accordance with the Company's policy, the accounting department controls derivative transactions and requires approval by the director responsible for accounting and the representative directors of the Company. The director who has the responsibility to control the performance and the related risks connected with derivatives reports these to the Management Committee of the Company.

The Company uses interest rate swaps to avoid risks from interest rate fluctuations on borrowings. The exception method of hedge accounting is used to account for those transactions.

(Currency related)	Millions of yen					Thousands of U.S. dollars			
		Contract amount		Fair value		Unrealized gain (loss)		Fair value	Unrealized gain (loss)
Forward foreign exchange contracts:	2007	2008	2007	2008	2007	2008	2008	2008	2008
Sell:									
US\$	¥ 343	¥ 549	¥ 342	¥ 521	¥ (1)	¥ (28)	\$ 5,482	\$ 5,204	\$ (278)
EUR	50	_	51	_	1	_	_	_	_
NT\$	90	90	89	96	(1)	6	898	953	55
Total	¥ 483	¥ 639	¥ 482	¥ 617	¥ (1)	¥ (22)	\$ 6,380	\$ 6,157	\$ (223)

(1) Calculation of fair value

The fair value is calculated by the forward exchange rate.

(2) Derivative transactions to which hedge accounting was applied are excluded from the above table.

Note 15. Leases

The following pro forma amounts represent the acquisition costs, accumulated depreciation and net book value of the leased assets as of March 31, 2007 and 2008, which would have been reflected in the balance sheets if finance lease accounting had been applied to finance leases currently accounted for as operating leases.

	Acquisiti	on costs	Accumulated	depreciation	Net book value		
(Millions of yen)	2007	2008	2007	2008	2007	2008	
Machinery and vehicles	¥ 901	¥ 896	¥ 293	¥ 429	¥ 608	¥ 467	
Tooling and							
office furniture	53	53	25	36	28	17	
Total	¥ 954	¥ 949	¥ 318	¥ 465	¥ 636	¥ 484	
	Acquisition costs		Accumulated 200		Net book value		
(Thousands of U.S. dollars)							
Machinery and vehicles	\$ 8,9	44	\$ 4,286		\$ 4,658		
Tooling and							
office furniture	529			860	169		
Total	\$ 9,4	73	\$ 4,6	546	\$ 4,827		

The amount of outstanding future lease payments for finance leases subsequent to March 31, 2007 and 2008 are as follows:

	Millions	s of yen	Thousands of U.S. dollars
	2007	2008	2008
Due within one year	¥ 155	¥ 161	\$ 1,607
Due over one year	514	357	3,567
Total	¥ 669	¥ 518	\$ 5,174
Balance of accumulated impairment loss on leased assets	¥ —	¥ 4	\$ 47

Lease expenses and pro forma amounts of depreciation and interest expense for finance leases for the years ended March 31, 2007 and 2008, were as follows:

	Million	s of yen	Thousands of U.S. dollars
	2007	2008	2008
Lease expenses	¥ 195	¥ 192	\$ 1,916
Reversal of allowance for impairment loss on leased assets	¥ —	¥ 2	\$ 18
Depreciation	¥ 162	¥ 158	\$ 1,580
Interest expense	¥ 44	¥ 36	\$ 356
Impairment losses	¥ 6	¥ —	\$ —

Depreciation is calculated based on the straight-line method, assuming that useful life is within the lease term and salvage value is zero. Interest is calculated based on the discrepancy between total lease expenses and acquisition cost and is allocated to each term by the interest method.

Note 16. Segment information

The business segments were not presented because the Company's primary business activity is a single segment of electronic components.

Note 17. Stock option plan

At the shareholders, meeting held on June 21, 2002, a stock option plan was approved. Under this plan, certain directors, employees, directors and employees of affiliated companies were granted options to purchase common stock of 1,051,000 shares in total at an exercise price of \(\frac{1}{2}\)23 (\(\frac{1}{2}\)248). Those eligible could exercise the options when the market price exceeded 130% of the exercise price for preceding day within the term of exercise, which was from July 1, 2004, to June 30, 2007. Stock option activities during the year ended March 31, 2008, were as follows:

Number of Shares Outstanding at beginning of year 5,000 Exercised Exercisable at end of year ¥770 (\$7.69) The weighted average price of stocks when exercised

At the shareholders' meeting held on June 20, 2003, a stock option plan was approved. Under this plan, certain employees and employees of affiliated companies were granted options to purchase common stock of 482,000 shares in total at an exercise price of ¥442 (\$3.74). Those eligible could exercise the options when the market price exceeded 130% of the exercise price for preceding day within the term of exercise, which was from July 1, 2005, to June 30, 2008. Stock option activities during the year ended March 31, 2008, were as follows:

Number of Shares Outstanding at beginning of year Exercised 66,000 Exercisable at end of year 100,000 ¥849 (\$8.47) The weighted average price of stocks when exercised

Note 18. Related party transactions

Note 19. Business combination

On August 31, 2007, SMK Electronics Corporation U.S.A. and SMK LINK Electronics Corporation, consolidated subsidiaries of the Company, acquired from Interlink Electronics (U.S.A.) its remote control business segments. This acquisition provides the Company to expand the business in the field of remote control around U.S.A.

The results of operations for this business for the period from September 1, 2007 to March 31, 2008 are included in the accompanying consolidated statement of income for the year ended March 31, 2008.

The acquisition was accounted for using the purchase method of accounting.

The amounts of assets acquired and liabilities assumed of this business at the date of the acquisition were as follows;

	Millions of yen	Thousands of U.S. dollars
Current assets	¥ 400	\$ 3,994
Goodwill	856	8,544
Current liabilities	(104)	(1,038)
Acquisition cost	¥ 1,152	\$ 11,500

Note 20. Subsequent events

(a) The following appropriation of retained earnings of the Company, which has not been reflected in the accompanying consolidated financial statements for the year ended March 31, 2008, was approved at a shareholders' meeting held on June 24 2008

Julie 21, 2000.	Millions of yen	Thousands of U.S. dollars		
Cash dividends ($\$7.00 = \0.07 per share)	¥ 531	\$ 5,297		

(b) At the Company's Board of Directors held on April 24, 2008, a stock option plan was approved. Under this plan, certain employees, directors and employees of affiliated companies were granted options to purchase common stock of 1,102,000 shares in total at an exercise price of \(\pm\)509 (\(\pm\)5.08). Those eligible could exercise the options when the market price exceeded 130% of the exercise price for preceding day within the term of exercise, which was from June 1, 2010, to May 31, 2013.

Report of Independent Auditors

The Board of Directors SMK Corporation

We have audited the accompanying consolidated balance sheets of SMK Corporation and consolidated subsidiaries as of March 31, 2007 and 2008, and the related consolidated statements of income, changes in net assets, and cash flows for the years then ended, all expressed in yen. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in Japan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of SMK Corporation and consolidated subsidiaries at March 31, 2007 and 2008, and the consolidated results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in Japan.

The U.S. dollar amounts in the accompanying consolidated financial statements with respect to the year ended March 31, 2008 are presented solely for convenience. Our audit also included the translation of yen amounts into U.S. dollar amounts and, in our opinion, such translation has been made on the basis described in Note 2.
