SMK Named a CES 2022 Innovation Awards Honoree

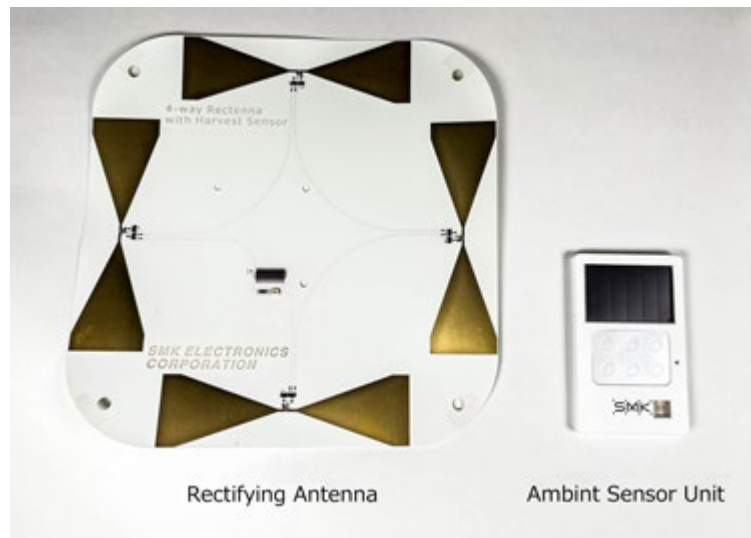

SMK Corporation (President, CEO and COO: Yasumitsu Ikeda) today announced that it has been named a CES[®] 2022 Innovation Awards Honoree in both “Sustainability, Eco-Design & Smart Energy” and “Smart Home” categories, in recognition of the company’s new SCPS (Self-Contained Power Supply) Bluetooth[®] Ambient Sensor.

SMK’s SCPS Bluetooth[®] Ambient Sensor features a hybrid power supply system with energy harvesting by photovoltaic (PV) cell and far-field wireless power transfer (WPT) converting Sub-GHz microwaves into electricity. No need to replace batteries, this is an environmentally friendly product. This device also includes functions for controlling home appliances and housing equipment using Bluetooth[®], making it best suited to Smart Home applications.

SCPS Bluetooth[®] Ambient Sensor will be on display in both the SMK Electronics Booth (#52560 Venetian Expo), and the Innovation Awards Showcase at CES 2022 (January 5th-8th, 2022, Las Vegas, Nevada), the world’s largest technology trade show.

SMK will continue to proactively products and technologies that contribute to the advancement of the IoT society and a carbon-free future.
